

Post 16 Learner Pathways

Students In Post 16 follow pathways that are specifically designed to equip them with the skills, qualifications, and knowledge required for their chosen career pathway. This approach ensures that learners gain a clear understanding of the qualifications and skills needed for future employment or further education and training and supports discussions during the Annual Review process. By aligning academic learning with career aspirations, we enable students to make informed decisions about their future and prepare them effectively for successful transitions into the workforce or higher education.
